

Patent  
232/117 (prev. 6646-101N6)

"callers," which recitation has antecedent basis in claim 24. Claims 72 and 73 are amended to change identification "number" to identification "data," which recitation has antecedent basis in claim 55, from which claims 72 and 73 ultimately depend. Applicant has amended Claim 74 by inserting "data" after the recitation "identification" to make claim 74 consistent with claim 72, from which claim 74 depends. Applicant has amended claims 98 and 123 by repeating "testing of the calling number identification data" to clarify that it is the testing of the calling number identification data which limits or prevents access to the interactive call processing format. Applicant has amended claim 108 to delete "said" before the recitation "at least one predetermined interval of time," which recitation does not have antecedent basis in claim 103, from which claim 108 depends.

Applicant respectfully requests the Examiner to consider and enter this amendment after allowance. None of the amendments requested here change the scope of the claims. As indicated above, the amendments requested here merely correct inconsistent recitations and serve only to further clarify the claims.

Respectfully submitted,

Dated: February 4, 2002
